Smart POS Terminal

Product Overview

The terminal integrates multiple billing modes into a single device and supports various payment methods, including QR code scanning and card authentication. Featuring a dual-screen design, the front 7-inch color screen supports multi-touch and displays application information. It is suitable for various consumption scenarios such as restaurants and supermarkets, providing users with a more user-friendly smart POS terminal.

Product Highlights

Ultra-Fast Payment

Supports card and QR payment methods for a smooth checkout experience.

Easy Installation

The desktop model is plug-and-play, while the wall-mounted model supports multiple installation scenarios.

Open Platform

Provides SDK & API development kits to help build your own dedicated applications.

Remote O&M

Optional remote TMS management platform for remote operation and maintenance, reducing cost and improving efficiency.
