

IoT Smart Door Lock

Newcapec

Stock Code: 300248

Newcapec's IoT smart door lock integrates IoT communication, biometric identification, and secure encryption technologies. It supports multiple unlocking methods such as card, PIN, fingerprint, mobile NFC, and remote access, providing a convenient and secure all-in-one solution for apartments, offices, and hotels.

Product Functions

Retrofit Model for Old Doors

- Specially designed for retrofitting old wooden doors and sheet-metal doors
- No need to replace the door and no drilling required, making installation easy even for beginners

Product Highlights

1320 - Fingerprint

● Tech Black

● Gunmetal Gray

High Security

Dedicated hardware encryption chip with end-to-end encrypted communication, resistant to copy and tampering

Ultra-Low Power Consumption

uA-level power consumption for the lock body, enabling ultra-long battery life

Easy Deployment

Supports on-premises deployment and rapid rollout on SaaS cloud Platforms

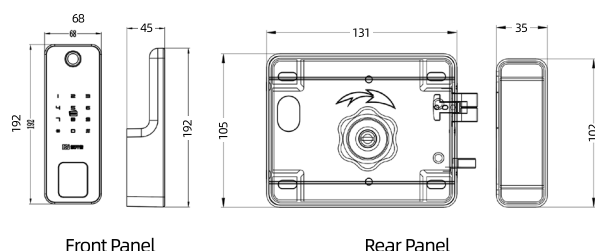

Open Integration

Provides hardware API interfaces and supports third-party system integration

Specifications

Color	Tech black / gunmetal gray
Lock Material	Integrated die-cast aluminum alloy
Lock body	Dedicated scissor latch, impact-resistant and durable
Authentication	Card, PIN, fingerprint
Communication	LoRa / Sub-1G / WIFI / 4G
Power Supply	4AA high-energy alkaline batteries
Dimensions	192 * 68 * 45mm
Suitable Door Types	old wooden doors / retrofitted iron doors (no drilling required)
Operating Temperature	-25°C~70°C
Relative Humidity	20%~80%
